How to Print

We strongly recommend having a professional printer print any graphics; this is to ensure resolution, correct cutting, and overall high quality. You although can print the graphics on your own, if you have knowledge of printing (printer settings, printer type, printing sizing, printing materials).

Utilize a .PSD File Editing Software // Recommended: Using Adobe Creative Suite (CS) Software
Can Purchase Here: www.adobe.com/products/catalog/cs6.html

How a 3.5"x2" Business Card should look.

This is how a 3.5"x2" card.. The bleeds are 0.125" thick on all sides, so the card measures 3.75x2.25 inch

Bleeds
The background and non-critical elements of a design should extend to this line.

Trim Line
The final size of the file and the line to which the printed card will be cut.

Safe Zone
Any text, logos or content placed in this area is entirely safe. You should place important info away from the trim line within the safe zone.
